## Admin Team Onboarding Emails

This article includes the onboarding emails sent to new Bitwarden Enterprise and Teams admins and owners from **care@bitwarden.com**. Feel free to read them all at once below, or grab them and adapt them to your team's needs.

## ⇒Enterprise

#### **Onboarding overview**

#### **Q** Example

Subject: Your Bitwarden onboarding checklist

Body:

Hi [name],

Welcome to Bitwarden!

In order to make sure you get the most out of your new password manager, you'll receive one email a day over the next week on how to set up Bitwarden. This way, you can quickly scale Bitwarden across your team. The emails will cover how to:

- Invite your admin team
- Set your enterprise policies
- Import your data
- Create groups and collections
- Invite users
- Get employee buy in
- Become a Bitwarden power user

In the meantime, feel free to review this Bitwarden onboarding guide for additional support.

Stay secure,

#### **Set Enterprise policies**

<b>V Example Subject</b> : Pro-tip for Bitwarden admins and owners	Сору 🗋
Body:	
Hi [name],	
Today's onboarding tip is critical for getting your Bitwarden organization ready for more team members: <b>Set your Ente policies</b> .	rprise
Enterprise policies allow Bitwarden Enterprise organizations to enforce security rules for all users, such as requiring two login. It's how Bitwarden admins and owners <b>set the right security foundations for their teams</b> , and build <b>a consistent deployment and user experience</b> for all team members.	
Some policies will remove non-compliant users from the organization when enabled, and some are not retroactively en so now is the time to nail down your organization's policies.	nforceable,

## **Q** Example

Subject: 2 ways to automate Bitwarden user provisioning

#### Body:

Hi [name],

Scalable success with Bitwarden comes from provisioning users smoothly and securely. Here are the top ways new admins and owners automate the process of getting employees on Bitwarden.

#### sso

With Login with SSO, Enterprise organizations leverage their existing Identity Provider to authenticate users with Bitwarden using the SAML 2.0 or OpenID Connect (OIDC) protocols. Learn about SSO.

#### SCIM

System for cross-domain identity management (SCIM) can be used to automatically provision members and groups in your Bitwarden organization. Bitwarden servers provide a SCIM endpoint that, with a valid SCIM API key, will accept requests from your Identity Provider (IdP) for user and group provisioning and de-provisioning. Learn about SCIM.

#### **Directory Connector**

The Bitwarden Directory Connector app automatically provisions users, groups, and group associations in your Bitwarden organization by pulling from a selection of source directory services. Provisioned users will be issued invitations to join the organization. Learn about Directory Connector.

## Employee buy-in tips

Copy

#### **Q** Example

Subject: How to get your employees to use Bitwarden

#### Body:

Hi [name],

You likely want to drive the most employee adoption possible with your new password manager. We have some tips to help.

Here's what Bitwarden recommends to get employees on board:

- 1. Appoint and implementation champion.
- 2. Communicate the implementation plan to employees.
- 3. Share this guide with employees your invite to Bitwarden: Get started with Bitwarden. You can also share this video training series.
- 4. Communicate the benefits of using a password manager (repeatedly).
- 5. Sign up for complimentary, 1:1 Bitwarden training here.
