SECRETS MANAGER > IMPORT & EXPORT

Export Data

Export Data

You can export your secrets data from the web app as a `.json` file. Exports will include projects and secrets, but not machine accounts or access tokens. Only the Secrets Manager data associated with organization currently selected from the organization selector will be exported. Items in other products or from other organizations will not be included.
To export your data:

https://player.vimeo.com/video/846444688

> ⓘ **Note**
>
> To export Secrets Manager data, your user account must be an owner or admin within the organization.

1. Select **Settings → Export data** from the left-hand navigation:

bitwarden

Säker och pålitlig lösenordshanterare med öppen källkod för företag

Export data

2. Select the **Export data** button. When prompted, enter your master password.
